

SPECIALLY DESIGNED FOR BOATING :

Checking the anchor line

Exit a thread caught in the propeller

Object fallen overboard

Hull inspection

EAZYDIVE can also be used for small pleasure or introductory dives, at anchor or from the beach. Ideal equipment for a short introduction to diving (with attendant confirmed!)

AVANTAGES :

It recharges with a small compressor for tires on the pods of 12V battery. A simple bicycle pump may be sufficient!
Free unlimited refill. Filling lasts for few minutes, aboard the boat or a car battery.

Inflation on board

Inflation on a car battery

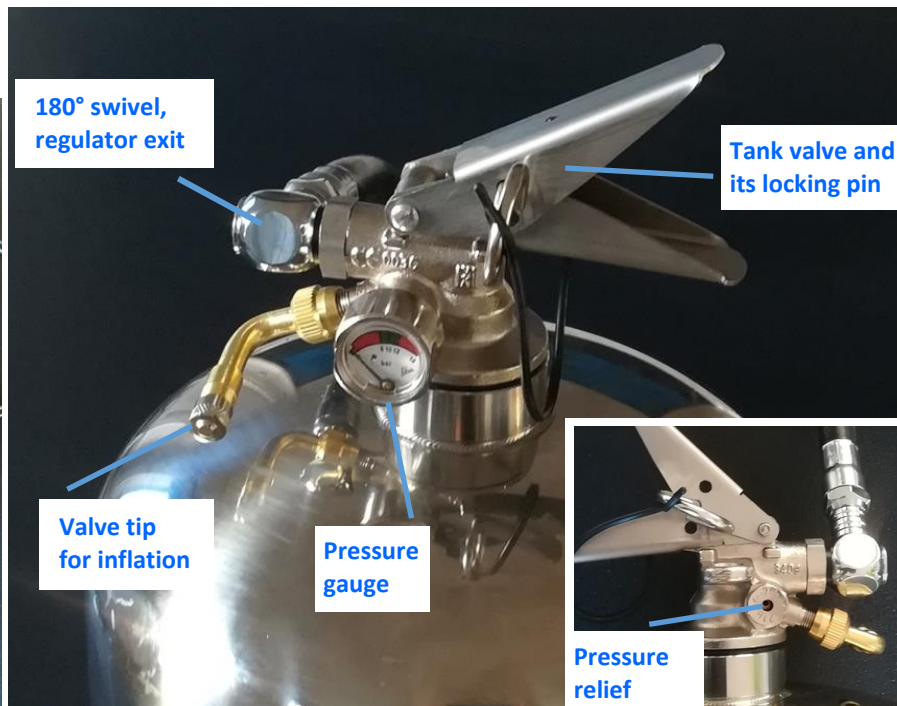

Inflation by a single tire valve on the scuba tank

FEATURES :

Stainless steel tank

EZDYDIVE in its bag

- Due to low pressure (≤ 10 bars), it is not subject to periodic inspections or regulatory retesting scuba tanks.
- It comes in a backpack that contains both the cylinder and regulator.
- Weight in the air : 3,5 kg. Zero weight in the water, with 4 additional 2 kg diving weights.
- The **cheapest dive kit on the market: € 374 free of tax**

Precautions and tips :

- Do not exceed 10 m depth in diving
- If one dives alone, be an experienced diver
- Do not block breathing during ascent
- The practice of diving requires medical fitness and a good physical condition

Approval : **EZDYDIVE** is tested at 27 bar, which means 3 times its normal operating pressure. It meets the requirements of the European norm EN 250 and benefits the marking **CE**
